

## rotary table

- Designed specifically to accumulate products before packing.
- Safe operation guaranteed with friction drive system
- Cox & Plant have designed a highly efficient Rotary Table for simple packing stations where automation is not feasible
- Useful in agricultural situations and general packaging halls
- Developed originally for agricultural usage, where packing lines needed to be established on a seasonal basis
- Used for packaging extruded products where total automation is not available

### **Application**

**Used throughout the industry for snack food, pasta and other delicate product**

**Also used in frozen food processors where speed is of the essence**

### **DESIGN**

- The rotary table design ensures that packers are not starved of product and lines are constantly moving and yields maintained
- The table top surface finishes are varied to suit the application
- The table rim liner can be U.H.M.W.P.

## **OPTIONS**

The table can be supplied complete with adjustable feet thereby allowing adjustable heights

The rotational speed is variable.

Can be supplied with a roller ball Packing Table with take off gravity roller bends to maximise efficiency.

Table Dimensions are available in four sizes: 1000mm, 1200mm, 1500mm & 1800mm.

Side loading table available as seen in the the above photograph

## **TECHNICAL SPECIFICATION**

Food grade stainless steel '304' complete with a dull polish finish with the exception of those items where it is not feasible or practical i.e. bearings, motor / gearbox etc
